

Infor Technology: Configuring and Administering Infor Security for the Cloud

This course covers configuring and administering security using Infor Federation Services (IFS). Exercises cover IFS integration with the Landmark technology platform to support applications such as CloudSuite Financials (CSF) and Global HR (GHR) although the process is very similar when integrating IFS with other Infor applications. The Identity Provider (IdP) integration process is also covered and includes an IdP integration example. **Note:** This course complements the training in **Lawson Technology: v11 Administering Landmark Security for the Cloud**. Both security training courses are recommended if using a Landmark application. This training is for v11 CloudSuite applications running on Infor OS.

Course duration

16 hours

Prerequisite knowledge

To optimize your learning experience, Infor recommends that you have the following knowledge prior to taking this course:

- Advanced security knowledge
- Knowledge of your organization's security models
- Proficiency with Landmark or equivalent experience

Course agenda

The agenda below details the contents of this course, including lesson-level learning objectives and supporting objectives.

Lesson	Lesson title	Learning objectives
	Course overview	Review course expectations.
1	Security concepts	Identify the various security concepts.

Lesson	Lesson title	Learning objectives
		<ul style="list-style-type: none"> Define each of the security concepts.
2	Introduction to Infor Operating System (OS)	Identify applications on the Infor Operating Service (OS). <ul style="list-style-type: none"> Identify each of the Infor OS applications.
3	Security framework	Describe the Infor security framework. <ul style="list-style-type: none"> Describe the Infor security framework.
4	Provision users	Describe the various methods to provision users. <ul style="list-style-type: none"> Define provisioning. List the steps to provision users.
5	Integration of an Infor application with Infor Federated Services (IFS)	List the basic steps to integrate an Infor application with Infor Federation Services (IFS). <ul style="list-style-type: none"> List the basic steps to integrate an Infor application with IFS. Explain the steps to integrate Landmark and IFS.
6	Integration with Identity Providers (IdPs)	Explain the Identity Provider (IdP) integration process. <ul style="list-style-type: none"> Explain the steps to integrate an IdP.
7	Maintenance and administration	Explain the maintenance and administration necessary for Infor Security. <ul style="list-style-type: none"> List the various maintenance and administration of Infor Security. Describe the steps to troubleshoot Infor Security.
Course summary		Debrief course.
