

Infor is a 14,000 person company, and our customer success requires us to train a lot of people internally and externally. We moved the company to New York in 2012, and are turning to institutions to create a talent pipeline. We leverage the same curriculum used to train our customers and partners to train institution solution leads and instructors. We provide ongoing support and speakers so instructors can successfully teach integrated courses, and for the students who do well in those, we prioritize available internship and open roles. Our goal is to hire the top students before other businesses can. It's in the early days, but the interest is high."

Charles Phillips, CEO, Infor

Our vision

Help member institutions:

- Drive excellence in their learning initiatives through free innovative technologies
- Graduate more employable, highly-skilled students, and support their employment objectives
- Increase the number of students who pursue STEM sector careers

How it works

The Infor® Education Alliance Program (EAP) provides member institutions with access to free innovative technologies, hands-on industry learning initiatives, and train-the-trainer programming that can translate into marketable skills and experiences for students. It includes five EAP offerings that can combined to meet the needs of the institution or educational organization.

Tailored to support students in:

<ul style="list-style-type: none"> • Computer Science • Engineering • Information Technology • Entrepreneurship • Fashion 	<ul style="list-style-type: none"> • Industrial or Quantum Psychology • Business Management (General, HR, Logistics, and Accounting) 	<ul style="list-style-type: none"> • Enterprise Asset Management • Linguistics & International Business • Health, HIT & Life Sciences 	<ul style="list-style-type: none"> • Manufacturing • Energy • Sustainability • Supply Chain Management
--	--	--	--

Five EAP offerings:

	<h3>Solution Endowments</h3>		<h3>Product Certification</h3>
<p>Leading-edge industry solutions and training provided FREE of cost for professors looking to achieve experiential applied learning or labs for students as part of their coursework. Endowments can be used in three main ways:</p> <ul style="list-style-type: none"> • Integrated within the classroom • As a Center of Excellence for upper classman, PhDs and Research professors • For Self-Directed Product Accreditation & Certification which interested students can pursue to achieve deeper expertise 		<p>Self-directed online learning through Infor University for students interested in building deeper skills development and achieve accreditation or certification. Available for:</p> <ul style="list-style-type: none"> • Infor SyteLine • Infor Mongoose Application Development Platform • Infor Intelligent Open Network (ION) Middleware technologies 	
<h3>Centers of Excellence</h3>		<h3>Infor Scholars</h3>	
<p>Application development eco-systems built on Infor's technology platform and/or thought leadership eco-systems in partnership with Infor Dynamic Science Labs team.</p>		<p>Give students an opportunity to intern year-round with Infor various teams across the enterprise.</p>	
		<h3>Skills Marketplace</h3> <p>Connect students with global, market-leading brands, customers, and partners to discover employment and partnership opportunities.</p>	

The EAP Process:

Discover

Through sharing the institution's goals and student learning objectives and learn how specific Infor solutions and/or technology platforms may support those objectives.

Decide

Which Infor focus industries, solution(s) and/or technologies may be best suited for use at the institution for classroom integration, project work, center(s) of excellence, and/or self-directed study.

Plan

Course, project, center and/or usage outlines, as well as drive college, faculty, and student awareness for selected uses.

Enable

Institution-led faculty support and faculty-led delivery of courseware, project work, self-directed learning activities and development of thought leadership materials; through IT train-the-trainer programs and faculty materials as well as training on product administration and use.

Support

Institution users to continue building on their success and gain more value from the partnership by providing Infor feedback and recommendations in periodic updates/checkpoint meetings.

Solutions and Technology Suites currently offered under this program include:

- Infor CloudSuite LN
- Infor CloudSuite M3
- Infor BI & Analytics (d/EPM/BI)
- Infor CloudSuite™ Industrial (SyteLine)
- Infor Cloudsuite Human Capital Management (HCM) & Talent Science
- Infor Enterprise Asset Management (EAM)
- Infor Tech Platform (ION, Ming.le, Mongoose)
- Infor Supply Chain Management (SCM)

Current Member Institutions of the Education Alliance Program include:

- Brandeis University
- Chengdu Neusoft University
- City Polytechnic High School
- City University of New York
- Fashion Institute of Technology
- Georgia Institute of Technology
- Hampton University
- Pace University
- Princeton University
- University of Minnesota
- University of Texas at Arlington
- University of Parma
- Washington University in St. Louis

Since launching in September 2014, this global initiative has garnered interest from over 135 organizations; it is expanding to include P-Tech, early college, and STEM focused high schools and organizations.

Throughout its history, Pace has emphasized real-world experience and professional preparation combined with a robust liberal arts curriculum to give our graduates a head start in their post-graduate endeavors. We continually strive to give our students unique opportunities to engage with businesses throughout their academic careers; the Education Alliance Program allows us to deliver on that commitment in innovative and exciting ways. Giving our students hands-on access to software tools and problem-solving techniques in the classroom is a great means of integrating the classroom and the workplace."

Jean Gallagher, VP for Strategic Initiatives, Pace University
